

Clinical leadership. A group behind the practice.

Company overview

Established in 2019, VHI brings together thirteen veterinary businesses across six cities in India and the United Arab Emirates.

Clinical leaders and management teams work as peers. Clinicians are salaried, and no referral commission is paid or taken anywhere in the group.

Partner your practice

A practice that joins the group keeps its name, its team, and its clinical and operational control. Specialist support and structured education sit behind it.
